## About the Book

Liberated: The Economics of Hope in a World of Despair is a groundbreaking book that offers a new perspective on the global economy. The book argues that the current economic system is based on a false premise: that humans are rational actors who always make decisions in their own best interest. In reality, humans are often irrational and make decisions that are harmful to themselves and others. This irrationality leads to a number of problems, including market failures, financial crises, and climate change.

The book offers a new economic model that takes into account the irrationality of humans. This model shows that it is possible to create a more just and sustainable economic system that works for everyone.
