## A New Kind of Souls Game

Sekiro is a departure from the traditional Souls formula in several ways. First, the game is set in a specific historical period, rather than in a fantasy world. This gives the game a more grounded feel and allows for more realistic world-building.

Second, Sekiro features a new combat system that is more focused on stealth and verticality. Players can use grappling hooks to climb walls and rooftops, and they can use stealth to take down enemies without being seen. The combat is fast-paced and challenging, but it is also fair and rewarding.

Third, Sekiro does not have the same character customization options as the Souls games. Instead, players play as a single character named Sekiro. This gives the game a more focused and personal story.

## **A Challenging and Rewarding Experience**

Sekiro is a challenging game, but it is also a rewarding one. The game's combat is difficult, but it is also fair and rewarding. Players who are willing to learn the game's mechanics and experiment with different strategies will be able to overcome even the most difficult challenges.

Sekiro also has a deep and engaging story. The game's world is rich and detailed, and the characters are well-developed. Players who take the time to explore the game's world and talk to its characters will be rewarded with a truly immersive experience.

## **The Verdict**

Sekiro: Shadows Die Twice is a must-play for fans of action-adventure games and Souls games. The game's challenging combat, immersive world, and engaging story make it one of the best games of the year.
