

The Money Mafia World In Crisis: Uncovering the Hidden Power Structures Controlling the Global Economy

The global financial system is in crisis. The gap between the rich and the poor is widening, and the middle class is disappearing. The world is facing a climate crisis, and the future of our planet is at stake.

But what if I told you that these crises are not just the result of bad luck or natural disasters? What if I told you that they are the result of a deliberate plan by a small group of elite bankers and financiers?

In *The Money Mafia World In Crisis*, authors William Engdahl and F. William Engdahl provide a wealth of evidence to support their claims that the global financial system is rigged against the vast majority of people. They show how a small group of elite bankers and financiers have

manipulated the financial system for their own gain, leading to the current economic crisis.

Engdahl and Engdahl trace the history of the money mafia back to the early days of the Federal Reserve. They show how the Fed was created by a group of powerful bankers who used it to bail out their own banks after the Panic of 1907. Since then, the Fed has been used to inflate asset bubbles and to bail out the banks whenever they get into trouble.

The authors also show how the money mafia has used its control of the financial system to fund wars and to destabilize governments. They argue that the current economic crisis is just the latest example of the money mafia's plan to control the world.

The Money Mafia World In Crisis is a must-read for anyone who wants to understand the true nature of the global financial system and how it is rigged against the vast majority of people. It is a powerful indictment of the money mafia and a call to action for all who believe in a more just and equitable world.

Here is what some of the experts are saying about *The Money Mafia World In Crisis*:
