**Unlock Your Superpowered Potential**

## Are you an Agile Superhero? Eight Attributes for Success

- 1. Models Agile Values**

To excel in agile you must consider some core values in your approach to work, attitude and the way you relate to others.

  - ★ In your team collaborative, self-sufficient and accountable?
- 2. Courageous**

An agile superhero must count courage as one of their key traits! Fight against fear of change, sleep and bureaucratic behaviors, and complex thinking.

  - ★ Show your courage: be honest, take risks, don't push failure and show humility.
- 3. Deep Understanding and Experience of Agile and Lean Thinking**

Delve to conquer frameworks and techniques such as scrum, kanban, Extreme Programming (XP), lean and DevOps, driving continuous delivery.

  - ★ Are you sustaining your development?
  - ★ Are you striving to become multi-skilled?
- 4. Good Communicator**

An agile superhero must have a great set of interpersonal communications skills to work by continuously improving their ability to communicate with stakeholders.

  - ★ What's your style of communication?
  - ★ Do you interact productively with all stakeholders?
- 5. Inspirational Leadership**

Agile superheroes are not rigid, proscribed or authoritarian, which makes inspirational leadership key. Your agile team should be accountable and self-sufficient – everyone is a leader. Adapt the leader-leader structure and be an agile superhero.

  - ★ In your team self-directing and empowered?
  - ★ Are all your team members leaders?
- 6. Multiskilled/Lifelong Learner**

To be an agile superhero you must be open to new skills and build this into your learning process. The more multi-skilled an agile team is, the better it can solve problems together quickly.

  - ★ Don't rely on one expert in your team – you should all be experts!
- 7. Problem Solver**

An agile superhero must be a self-motivated problem solver who confronts reality through rigorous thinking. When a problem arises that hinders progress, an agile superhero has the responsibility to resolve it.

  - ★ Use your skills, agile values and experience to solve the problems that arise every day.
- 8. Agent of Change**

How do you face organizational resistance? An agile superhero needs to adopt the role of change agent – a catalyst to evangelize, advocate, model and co-create changes to help push the organization forward into a new agile world.

Agile superheroes are not born with agile superpowers. They seek new and better ways to accomplish their goals through continuous problem solving, team and individual learning.
